

REMOTE VIEWING SESSION
Session Data Record

Session Information:

Date: 03/29/85 From: 0855 hrs to ____ hrs.
(MM DD YY)

Session Type: CRV Session Class: A Highest stage reached: V
For (training/operations)

Notes: A/S PJ 19

Personnel Information:

Remote Viewer: Paul
Interviewer: Fred

Observers: _____

Site Information:

Site #: 121

Site: VYAZMA Railroad Yard Mark

Evaluation of the session:

(+/-/NA): +

Comments: 3

Site is a group of buildings (structures) varied in sizes and shapes but generally large and impressive in ~~the~~ a ~~set~~ cold perhaps snowy place. This group of buildings is fenced off (secure) from what may be a nearby populated area. One of the buildings appears round or rounded, and ~~the~~ reminds me of a nuclear power plant. Steam or smoke and coal smells characterize the site. ~~Although water is returned to the site~~ Construction of some form may be underway. If the site is a power plant ~~that~~ it may not be "on line" at present because there is no sense of energetics. ~~People~~ The site has a mechanical/technical/power control type function. People at the site are "workers" and ~~also~~ wear uniforms (NFI).

WANG Summary: a fenced group of structures characterized by smoke or steam reminiscent of a power plant.

Site end.
